PROFILE

I test applications across Android, iOS, Huawei, Amazon and Windows. I assess stability, reproducibility and the impact of defects on user experience, with attention to UX/UI and application behavior and logic.

End-to-end product validation: from requirements and test documentation to release regression, analytics and monitoring.

EXPERIENCE

July 2025 — Present

Glam AI — QA Specialist

- Manually tested the iOS app, APIs and backend integrations, including AI/ML image and video processing features.
- Validated subscription and monetization flows: paywalls, purchases, trials, cancellations, renewals and subscription expiry.
- Contributed to product-team improvements in Daily Shots, where retention increased by 50%.
- Planned and performed functional, regression, integration, smoke and exploratory testing for weekly releases.
- Tested APIs and backend logic using Postman, Charles Proxy and Proxyman.
- Investigated and reproduced production defects with iOS, backend, ML, computer vision, support and product teams.
- Participated in CI/CD release processes; worked with Xcode, TestFlight and GitHub.
- Used Firebase, Bugsnag, Adapty and Amplitude to validate stability, subscriptions and product flows.

October 2023 — May 2025

Playrix — QA Specialist

- Manual testing on iOS, Android, Amazon, Huawei and Windows
- Requirements analysis and decomposition to verify specification compliance
- Test cases, checklists, test plans and bug reports in Asana
- A/B testing and analytics-event validation in Amplitude and Swrve
- Server-side and client-side logic testing and release regression
- Traffic analysis, request interception and modification with Charles Proxy
- Crash and non-fatal error analysis in Sentry
- Git-based test-server changes for environment and event setup

GEVORK AKOPYAN

QA Engineer (Mobile / Games)

EXPERIENCE

April 2023 — August 2023

Playgendary — QA Specialist

- Manual testing on Android and iOS
- Analytics testing with Adjust raw data and Firebase configurations
- Identified 60+ defects per month as part of KPI
- Build installation, logging and verification in Android Studio and Xcode
- Bug reporting in Asana and version-control work with Git
- Test documentation and test-run updates in TestRail
- Production releases and subsequent status monitoring

March 2022 — April 2023

DominiGames — QA Engineer

- Manual functional and non-functional testing on Android and iOS
- Internal feature testing and alpha/beta project testing
- Firebase Analytics, reporting, test plans and test documentation
- Project builds in Jenkins
- User-complaint tracking through Helpdesk
- Intern training and Team Lead replacement

SKILLS AND TOOLS
